

Active Multiple V2.1

The Active Multiple Eurorack PCB and Front Panel Kit is a simple and reliable DIY utility module designed to distribute control voltages and audio signals without voltage drop. Using buffered outputs, it ensures stable signal duplication across multiple destinations in your modular system.

Bom

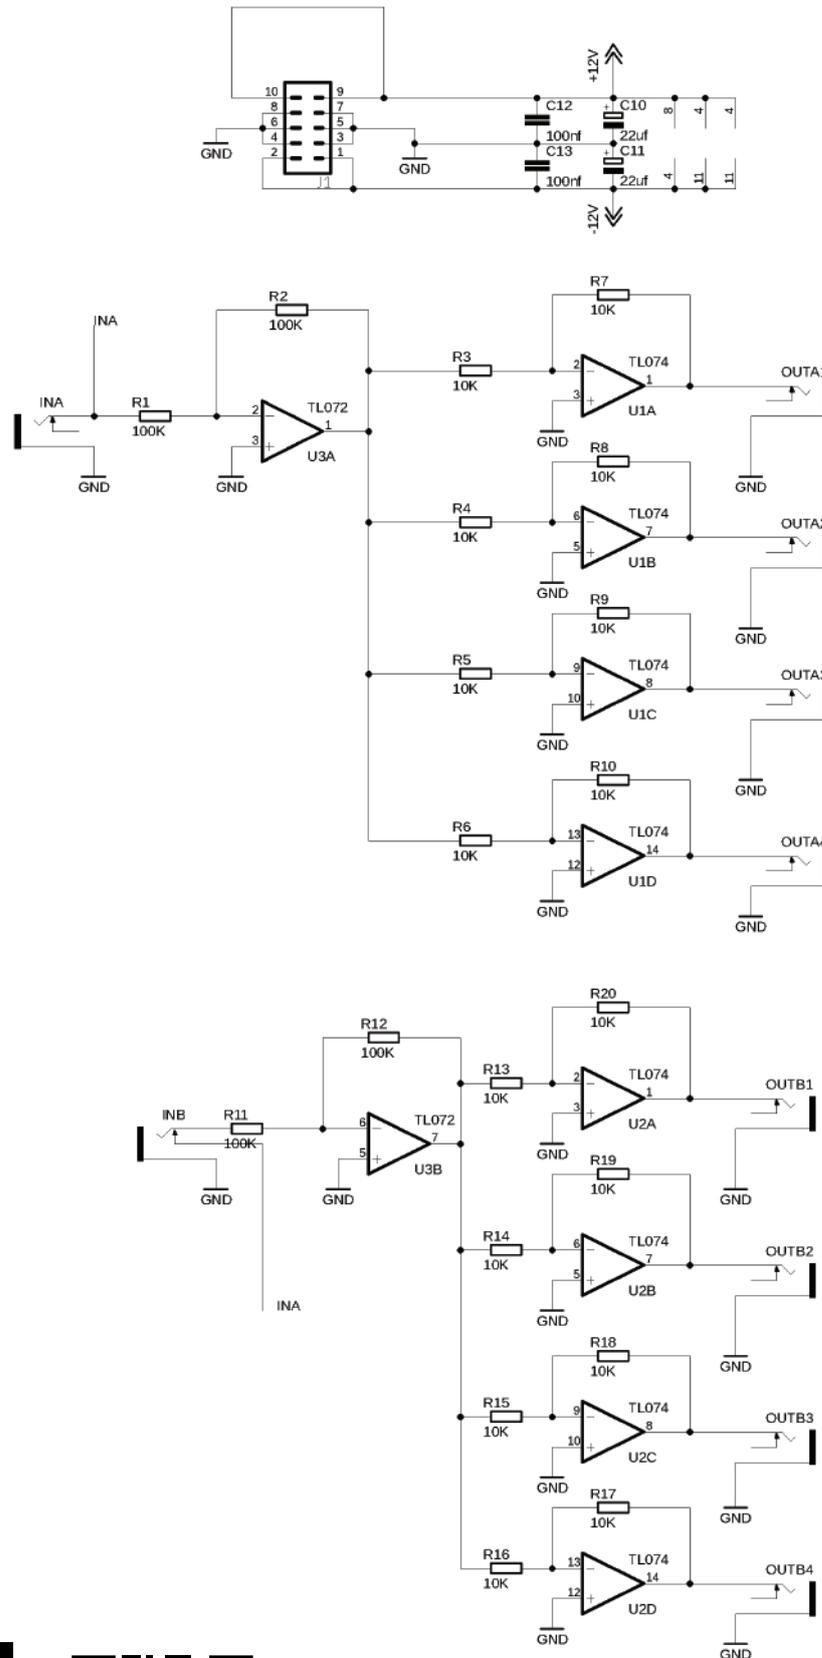

| Qty | Value | Part Number |
|-----|------------------------------|--|
| 1 | 10 Pin IDC Socket/Euro Power | J1 |
| 4 | 100K | R1, R2, R11, R12 |
| 2 | 100nf | C12, C13 |
| 16 | 10K | R3, R4, R5, R6, R7, R8, R9, R10, R13, R14, R15, R16, R17, R18, R19, R20 |
| 2 | 22uf | C10, C11 |
| 10 | TPJM398SM / Jack Socket | INA, INB, OUTA1, OUTA2, OUTA3, OUTA4, OUTB1, OUTB2, OUTB3, OUTB4 |
| 1 | TL072 | U3 |
| 2 | TL074 | U1, U2 |

Use capacitors rated 25V or higher.

Calibration

No Calibration is needed.
